The difference in content is that "Get Tough" lacks the final chapter of "All-in Fighting", which covers the use of the bayonet. This book is an important cultural artifact, in that it encapsulates the teachings of Fairbairn as given to British forces. However, as a book on effective combatives, it falls flat.

Fairbairn published his book, 'Defendu', in 1926 (reprinted as 'Scientific Self Defence' in 1931), illustrating this method and it is here

that the term 'Defendu' first appeared. This confused early readers of the book, who assumed that the techniques within it had been based mainly in the Eastern martial arts that Fairbairn had learned. Fairbairn was called upon by the British to help train Allied troops in World War II. Fairbairn and others expanded on this system to

create the Close Quarters Combat system that was then taught to the troops. This system was built on Defendu, but modified for military applications, rather than police and riot control. The original Defendu was oriented towards self-defence and restraint, while the Close Quarters Combat system concentrated on rapid disabling of an
