An invaluable resource, Dressmaking will guide you through all the stages of making, altering, and customizing clothes. Starting with the Tools and Materials, you will learn what you need to buy and how to use it. The Fabrics chapter demonstrates the drape and weave of fabrics and explains the best uses of each. The Patterns chapter

Download Ebook Convertible Dress Instructions

covers everything from understanding a pattern to altering one. In *General Techniques*, close-up photography and guiding annotation to explain key techniques step by step. A section on *Basic Patterns and Variations* then guides you through creating six garments. Patterns and detailed step-by-step instructions are provided for a skirt, dress, shirt, tee, jacket, and pair of trousers. Instructions are also given for possible variations of each garment. Finally, chapters on *Alterations and repairs* and *Customizing* offer practical tips for repairing worn items and inspiration for modernizing tired pieces. Packed with essential advice and inspiration, this is the dressmaking bible that no budding seamstress should be without.

This fourth edition of *Metric Pattern Cutting for Children's Wear and Babywear* remains the standard text book but has three major improvements. First, the sections have been re-organised to reflect changes in producing and marketing children's clothes. Today's popularity of easy-fitting styles and knitted fabrics means that basic 'flat' pattern cutting is used to construct the majority of children's wear and babywear and this type of cutting is therefore emphasised in this new edition. Shaped blocks and garments, cut to fit the body form, are still included, and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes. The book now clearly separates the sections useful to student beginners (Parts One, Two and Three), and also offers more advanced or specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade. The second change in this fourth edition is the introduction of colour coding to the sections; this makes it easier to identify specific processes in the book and enhances the illustrations. Finally, the size charts have been revised to reflect the changes in body sizing. The clear division of the boys' and girls' measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts. 'Plus' charts for heavier children have also been added.

Contains forms and instructions for the Form R and Form A that TRI (Toxics Release Inventory) submitters use each year to report toxic chemicals released into the land, water, or air.
