

## Explicit And Recursive Sequences Practice Answer Key

Right here, we have countless ebook **explicit and recursive sequences practice answer key** and collections to check out. We additionally manage to pay for variant types and as well as type of the books to browse. The standard book, fiction, history, novel, scientific research, as skillfully as various new sorts of books are readily nearby here.

As this explicit and recursive sequences practice answer key, it ends occurring being one of the favored book explicit and recursive sequences practice answer key collections that we have. This is why you remain in the best website to see the incredible books to have.

Sal finds an explicit formula of a geometric sequence given the first few terms of the sequences. Then he explores equivalent forms the explicit formula and finds the corresponding recursive formula.

[Explicit & recursive formulas for geometric sequences ...](#)

The main difference between recursive and explicit is that a recursive formula gives the value of a specific term based on the previous term while an explicit formula gives the value of a specific term based on the position. A sequence is an important concept in mathematics. It refers to a set of numbers placed in order.

Recursive formula is used to find the next term of the sequence using one or more preceding terms of the sequence. Explicit formula is used to find the nth term of the sequence using one or more preceding terms of the sequence. Recursive and Explicit Formulas - Example Problems. Example 1: First term of the sequence  $a_1 = 28$ , common difference  $d = 14$ , find the recursive formula of the arithmetic sequence. Solution: First term  $a_1 = 28$ , common difference  $d = 14$ . Second term  $a_2 = 28 + 14 = 42$
