Tourism is the world’s second largest industry employing on an average one out of twenty adult men and women world-wide and the ratio is one out of ten when it comes to the developed countries like USA. The growing ranks of international leisure travellers are being influenced by business travellers who, are flooding into India as a result of economic liberalisation. It is thus imperative that our professional tourism corps be trained to meet these exacting requirements. Both in public and private sectors, the increasing understanding of these needs is leading to the development of institutes, training centres and academic programmes in tourism management. There is thus a great need for comprehensive professional literature. This two-volume series volume tells readers all that they want to know about tourism -- its history, networks and intricate operations. Volume Two discusses in detail how different tourism sectors operate and market themselves -- travel agencies, tour operators, hotels, restaurants, airlines -- as well as the impact of changing technology on their activities.

The book analyses the Indian Supreme Court ’s jurisprudence on homosexuality, its current approach and how its position has evolved in the past ten years. It critically analyses the Court ’s landmark judgments and its perception of equality, family, marriage and human rights from an international perspective. With the help of European Court of Human Rights ’ judgments and international conventions, it compares the legal and social discrimination meted out to the Indian LGBTI community with that in the international arena. From a social anthropological perspective, it demonstrates how gay masculinity, although marginalized, serves as a challenge to patriarchy and hegemonic masculinity. This unique book addresses the lack of in-depth literature on gay masculinity, elaborately narrating and analysing contemporary gay masculinity and emerging gay lifestyles in India and highlighting the latest research on the subject of homosexuality in general and in particular with respect to India. It also discusses several new issues concerning the gay men in India supported by the living law approach put forth by Eugen Ehrlich.

India has been in transition for the last two decades, moving from a mixed economy toward a market economy model, and the Indian hospitality industry is metamorphosing into a mature industry. It is time that the story of the Indian hospitality industry is told. The Indian Hospitality Industry: Dynamics and Future Trends tells that story, one defined by the industry ’s push for growth in revenues and the struggle to match the revenue growth with profitability. The volume includes a selection of insightful chapters that offer research into the multiple dimensions of the Indian hospitality industry. The book covers many segments of the hospitality sector, including hotels, events and catering businesses, and restaurants and coffee shops, both domestic and small mom-and-pop businesses as well as international chains. The opening chapters set the tone for providing an overarching perspective on the status of the industry in terms of the macroeconomic variables and how they may have impacted the health of hospitality businesses in India. The book then goes on to explore a wide variety of issues. The editors and chapter authors are either practitioners themselves or researchers, looking at both domestic and international hospitality business in India and a wide variety of economic factors. The information divulged here will be important for stakeholders, which includes domestic and international hospitality professionals, business leaders, investors, and those in governmental positions, especially in the tourism ministry. The volume informs on the issues and challenges that the hospitality industry in India is up against. The book looks at the dilemma of a industry that responded to the demand growth promise by ramping up supply, only to find that the investments made were received by an actual growth that was way shy of forecasts and left investors with unexpected losses on their profit & loss statements and bloodied balance sheets.

This book, an essential text for hospitality management students, examines the relevance and applications of general management theory and principles to hospitality organizations. Using contemporary material and case studies, the book indicates ways in which performance may be improved through better use of human resources. Rigorous academic theory is related to hospitality practice, based on the authors’ great knowledge of the hospitality industry. The text takes a vocational basis and the illustration of the theory with the real-life examples of hospitality management in action provides a solid and stimulating introduction to the subject.

Hotel rating systems are used in almost all countries. The policy makers, managers, and researchers take this process seriously, and contribute in enhancing the system to reflect the needs of the modern traveler. Hotels also invest a lot for getting the desired star ratings. However, at the same time, apart from the guidelines and manuals of the star rating schemes, there is hardly any reliable source of information explaining the principles on which the star rating process is based. The available information can be confusing as different rating systems have different criteria for hotel evaluation. Considering this challenge, this book attempts to bring the star rating process to life through the principles of service quality management because hotel rating systems claim to raise standards of service. Such principles were identified through hundreds of research studies and existing hotel rating systems around the world. This book focuses on making the hotel rating process simple to understand for the benefit of students, managers, and policymakers.
