This newly revised and updated companion for every innovator, innovation team leader, operations manager and corporate change agent presents, in an easy-to-use format, more than 50 tools and techniques for identifying innovation opportunities, generating new and unusual ideas and implementing new solutions.

Innovation principles to bring about meaningful and sustainable growth in your organization Using a list of more than 2,000 successful innovations, including Cirque du Soleil, early IBM mainframes, the Ford Model-T, and many more, the authors applied a proprietary algorithm and determined ten meaningful groupings—the Ten Types of Innovation—that provided insight into innovation. The Ten Types of Innovation explores these insights to diagnose patterns of innovation within industries, to identify innovation opportunities, and to evaluate how firms are performing against competitors. The framework has proven to be one of the most enduring and useful ways to start thinking about transformation. Details how you can use these innovation principles to bring about meaningful—and sustainable—growth within your organization Author Larry Keeley is a world renowned speaker, innovation consultant, and president and co-founder of Doblin, the innovation practice of Monitor Group; BusinessWeek named Keeley one of seven Innovation Gurus who are changing the field The Ten Types of Innovation concept has influenced thousands of executives and companies around the world since its discovery in 1998. The Ten Types of Innovation is the first book explaining how to implement it.

How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in Innovation and Entrepreneurship. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. With a new foreword by Joseph Maciariello

Innovative ruptures of traditional boundaries in value chains are requiring companies to rethink how they go to market, what they need to own, what they need to retain and innovate as core competencies, and how they innovatively deal with suppliers and customers. The key message of the book is that the new knowledge-networked innovation economy requires a totally different strategic management mindset, approach and toolbox, and its major value-added is a new strategic management approach and toolbox for the innovation economy - a poised strategy approach. Designed for both managers and advanced business students, the book provides a unique combination of new management theory, selected managerial articles by prominent scholars such as Clayton Christensen, Henry Chesbrough, Sumantra Ghoshal, Quinn Mills, and Peter Senge, and a wide array of real-world case examples including GE, Shell, IBM, HP, BRL Hardy, P&G, Southwest Airlines and McGraw-Hill, within the dynamics of industries such as airlines, energy, telecommunications, wine & beverages, and computing. The authors illustrate powerful new strategic innovation concepts and tools, such as poised strategy for managing multiple business models, poised strategy scorecards (moving beyond the well-known balanced scorecard), the wheel of business model reinvention, and organizational rejuvenation methods. The book includes the concepts of: Poised Strategic Management, Organizational Rejuvenation, Business Models as Platform for Strategy, Poised Scorecards, Identifying Sources of Innovation in Business Ecosystems.
