The MATLAB® programming environment is often perceived as a platform suitable for prototyping and modeling but not for "serious" applications. One of the main complaints is that MATLAB is just too slow. Accelerating MATLAB Performance aims to correct this perception by describing multiple ways to greatly improve MATLAB program speed. Packed with thousands of helpful tips, it leaves no stone unturned, discussing every aspect of MATLAB. Ideal for novices and professionals alike, the book describes MATLAB performance in a scale and depth never before published. It takes a comprehensive approach to MATLAB performance, illustrating numerous ways to attain the desired speedup. The book covers MATLAB, CPU, and memory profiling and discusses various tradeoffs in performance tuning. It describes both the application of standard industry techniques in MATLAB, as well as methods that are specific to MATLAB such as using different data types or built-in functions. The book covers MATLAB vectorization, parallelization (implicit and explicit), optimization,

memory management, chunking, and caching. It explains MATLAB ' s memory model and details how it can be leveraged. It describes the use of GPU, MEX, FPGA, and other forms of compiled code, as well as techniques for speeding up deployed applications. It details specific tips for MATLAB GUI, graphics, and I/O. It also reviews a wide variety of utilities, libraries, and toolboxes that can help to improve performance. Sufficient information is provided to allow readers to immediately apply the suggestions to their own MATLAB programs. Extensive references are also included to allow those who wish to expand the treatment of a particular topic to do so easily. Supported by an active website, and numerous code examples, the book will help readers rapidly attain significant reductions in development costs and program run times.

PTU is an underappreciated noir masterpiece by one of Hong Kong's most prolific and commercially successful directors. Johnnie To Kei-fung has been called "the poet of post-1997 and the economic savior of the Hong Kong film industry" for an extraordinary range of films produced during some of Hong Kong cinema's most difficult years. While many of To's celebrated films such as Election, Exiled and The Mission feature themes of criminal glory and revenge, PTU centers on the ethical dilemmas, personal dramas and stoic teamwork in the elite Police Tactical Unit. The story follows the PTU's all-night search for an officer's missing gun as they navigate triad turf struggles and marauding jewel thieves from mainland China. Shot

over several years in the hauntingly empty pre-dawn streets of Tsim Sha Tsui, and released coincidentally amid the 2003 SARS panic, the film evokes Hong Kong's post-handover economic despair and multiple identity crises. In terms of character development and psychological complexity, Mike Ingham argues that PTU is the most aesthetically rigorous and satisfying of To's many films.

In a language kids can understand, Randy Alcorn explores Biblical answers to the questions kids often have about heaven. As in the adult title, Heaven, he addresses the difference between the present Heaven, where we go when we die, and the New Earth, where we will live forever with Jesus after he returns.

Intended for kids age 8-12, Heaven for Kids is sure to be an excellent resource for families, especially those in which the parents have read the adult title and wish to pass on that same level of understanding to their children. The book features ten chapters of questions, and answers based on scripture and written in a style relevant to today's kids. The book also has a summary of the Gospel for those who want to be sure they are going to Heaven someday. Randy encourages kids to live “ in Light of Heaven. ”
