If you're a healthcare provider or health coach, you CAN use motivational interviewing effectively, even when you have less than 10 minutes with a client. Have you fallen into the trap of trying to 'cover it all' with your client in a short amount of time, only to have it backfire as they stare blankly at you? The techniques and tips outlined in this book will give you the tools you need to most effectively use whatever time you have. This book is the most practical and usable MI reference you'll ever find. We've included many of the settings dietitians, nurses, diabetes educators and health coaches are likely to encounter. We've attempted to cover a wide range of disease states and lifecycle conditions, as well as a variety of client personalities. For each, we've included loads of counseling vignettes, with dialogue you may frequently hear from clients, as well as suggestions on how you might respond. For each vignette, we've included the total time, so you can see just how effective 5-7 minutes can be! Note: When you purchase this book, you also get access to 5 1-hour webinars, each focused on a specific challenge area for short-stint MI. You'll also hear actual dialogue between a client and professional, to give you more ideas about troubleshooting your use of MI in a short timeframe. Ready to set aside your "fixing" reflex and put your client in the driver's seat? Let's get started.

Developing expertise in motivational interviewing (MI) takes practice, which is exactly the point of this engaging, user-friendly workbook. The volume is packed with real-world examples from a range of clinical settings, as well as sample interactions and hands-on learning activities. The author is an experienced MI researcher, clinician, and trainer who facilitates learning with quizzes, experiential exercises, and reproducible worksheets. The reader learns step by step how to practice core MI skills: raising the importance of behavior change, fostering the client's confidence, resolving ambivalence, solidifying commitment to change, and negotiating a change plan. The utility of the book is enhanced by the large-size format and lay-flat binding. The book shows how to navigate each session using microskills that many clinicians already know: open-ended questions, affirmations, reflective listening, and summaries, or OARS for short. This book is in the Applications of Motivational Interviewing series.

Much of health care today involves helping patients manage conditions whose outcomes can be greatly influenced by lifestyle or behavior change. Written specifically for health care professionals, this concise book presents powerful tools to enhance communication with patients and guide them in making choices to improve their health, from weight loss, exercise, and smoking cessation, to medication adherence and safer sex practices. Engaging dialogues and vignettes bring to life the core skills of motivational interviewing (MI) and show how to incorporate this brief evidence-based approach into any health care setting. Appendices include MI training resources and publications on specific medical conditions. This book is in the Applications of Motivational Interviewing series.

Wellness, Not Weight: Health at Every Size and Motivational Interviewing, brings a new, well rounded perspective to issues of weight, health and helping people change behavior. While many texts in the areas of health sciences and nutrition discuss specific, singular approaches to weight loss, this book is the first to address Health at Every Size (HAES), Motivational Interviewing (MI), and a non-diet, wellness approach to managing health and weight within one comprehensive text. The book is divided into three parts. Part One explores the three basic concepts of the book, the argument for a focus on wellness rather than body weight, the Health at Every Size paradigm, and Motivational Interviewing. Part Two provides more detailed background information for professionals and academics. It presents the science behind the approaches. Included articles offer clear, cogent explanations of potential risks and failures in a weight-centered approach to health, as well as discussions of the risks of a weight centered approach, including disordered eating and body image issues. This section of the book also provides information on how rigid attachment to dietary guidelines can be harmful to consumers, with a special exploration of the dangers posed to children. Part Two ends with articles exploring the need for size acceptance, teaching the concept of Health at Every Size, and the importance of teaching Health at Every Size ideas in

the training of health care professionals. Part Three of the book helps health care professionals communicate a non-diet approach to clients and patients, as well as a discussion of the use of Motivational Interviewing techniques with a non-diet approach. Moving away from traditional approaches to weight loss, the included chapters discuss mindful eating, the eating competence model, practical steps for improving health, and non-dieting and spirituality. *Wellness, Not Weight: Health at Every Size and Motivational Interviewing* speaks to the emerging movement emphasizing wellness, not weight. Written with passion and insight, the book encourages people to nourish and exercise their bodies in healthy, loving and joyous ways. This book can be used in Health Sciences, Nutrition and Food Science, and Public Health courses. It is also useful for courses in Sociology, Psychology, and Women's Studies. Ellen Glovsky, Ph.D, RD, LDN is a Registered Dietitian and a member of the teaching faculty at Northeastern University in Boston, MA. Dr. Glovsky conducts workshops and consultations on Motivational Interviewing (MI) for a variety of organizations around the US. She is a member of the Motivational Interviewing Network of Trainers (MINT), the international professional organization of MI practitioners and trainers. Dr. Glovsky maintains a private practice in which she offers treatment for eating disorders and weight management.

This highly anticipated second edition features two all-new chapters, including *The Human Brain and Social Threat: Impact on Patients and Health Care Professionals* and *How Do I Know What Skill to Use?* Both chapters result from what the authors have learned from their interactions over the past six years with their students and health care professionals. The authors have applied motivational interviewing to the complex behavior change that is central to patients being able to manage chronic illnesses such as diabetes, high blood pressure, high cholesterol, and osteoporosis.. This book identifies critical interactional dynamics to assist health care providers (HCP's) in developing a conversational "flow" with the patient. How does empathic understanding create a relationship that allows patients to discuss barriers (and benefits) to managing their illnesses? How can the HCP guide patients to choices they can make to manage their illnesses? How do we encourage patients to talk about how they make sense of their illnesses and what is happening to them? Using MI will enable you to communicate with your patients in a clear, concise, and sensible way that helps open your patients to the possibility of behavior change. By using the tools and skills in this revised second edition, you can have a greater impact on improving your patient outcomes. Key Features: - Two new chapters address the human brain and social threat, and how to know what MI skills to use - Provides a practical, step-by-step approach to the use of MI skills and tools in all practice settings - Includes multiple dialogues between HCPs and patients to illustrate the use of MI skills and tools - Case studies vividly demonstrate the application of MI through extensive dialogues with video links - Review questions at the end of each chapter underscore key concepts

Are you tired of being told by others--self-help books included--what you should do? Drs. Allan Zuckoff and Bonnie Gorscak understand. That's why this book is different. Whether it's breaking an unhealthy habit, pursuing that dream job, or ending harmful patterns in relationships, the key to moving ahead with your life lies in discovering what direction is truly right for you, and how you can get there. The proven counseling approach known as motivational interviewing (MI) can help. Drs. Zuckoff and Gorscak present powerful self-help strategies and practical tools that help you understand why you're stuck, break free of unhelpful pressure to change, and build confidence for developing a personal change plan. Vivid stories of five men and women confronting different types of challenges illustrate the techniques and accompany you on your journey. MI has a track record of helping people resolve long-standing dilemmas in a remarkably short time. Now you can try it for yourself--and unlock your own capacity for positive action.

People with diabetes often struggle to make healthy choices and stay on top of managing their illness. Filling a vital need, this is the first book to focus on the use of motivational interviewing (MI) in diabetes care. The uniquely qualified authors--physician Marc P. Steinberg has devoted much of his career to diabetes care, and renowned clinical psychologist William R. Miller is the codeveloper of MI--present proven counseling techniques that can make any conversation with a patient more efficacious and motivating. Numerous sample dialogues illustrate specific ways to elicit patients' strengths and help them overcome barriers to change in such areas as eating habits, physical activity, medication use, insulin treatment, substance abuse, psychological issues, and more. This book is in the *Applications of Motivational Interviewing* series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers. Winner (First Place)--American Journal of Nursing Book of the Year Award, Adult Primary Care Category
