But, as Donald E. Hall points out in *Muscular Christianity: Embodying the Victorian Age*, when the dominant male elite didn't feel they were “present” enough in society, they simply redefined masculine norms under a veil of Christian duty. America soon got a taste of masculine Christianity and evolved it to serve a unique agenda.

Muscular Christianity was an important religious, literary, and social movement of the mid-nineteenth century. This volume draws on recent developments in culture and gender theory to reveal ideological links between Muscular Christianity and the work of novelists and essayists, including Kingsley, Emerson, Dickens, Hughes, MacDonald, and Pater, and to explore the use of images of hyper-masculinised male bodies to represent social as well as physical ideals. Muscular Christianity argues that the ideologies of the movement were extreme versions of common cultural conceptions, and that anxieties evident in Muscular Christian texts, often manifested through images of the body as a site of socio-political conflict, were pervasive throughout society. Throughout, Muscular Christianity is shown to be at the heart of issues of gender, class, and national identity in the Victorian age.

Muscular Christianity was an important religious, literary, and social movement of the mid-nineteenth century. This volume draws on recent developments in cultural and gender theory to reveal close links between the ideology of the movement and the work of novelists and essayists, including Kingsley, Emerson, Dickens and Pater. Throughout this book, which also contributes to the critical debate on the body as a site for socio-political conflict, Muscular Christianity is shown to be at the heart of issues of gender, class, and national identity in the Victorian age.

Dissatisfied with a Victorian culture focused on domesticity and threatened by physical decline in sedentary office jobs, American men in the late nineteenth century sought masculine company in fraternal lodges and engaged in exercise to invigorate their bodies. One form of this new manly culture, developed out of the Protestant churches, was known as muscular Christianity. In this fascinating study, Clifford Putney details how Protestant leaders promoted competitive sports and physical education to create an ideal of Christian manliness.

relationships and also by the emergence of an embryonic homosexual rights movement. Taking his cue from literary and lesbian and gay scholars, urban historians and cultural geographers, Matt Cook combines discussion of London's homosexual subculture with a detailed examination of its representation in the press, in science and in literature. The conjunction of approaches used in this study provides fresh insights into the development of ideas about the modern homosexual and into the many different ways of comprehending and taking part in London's culture of homosexuality."--Jacket.

Fixing Patriarchy: Feminism and Mid-Victorian Male Novelists explores representations of monstrous women in mid-Victorian literature, tracing anxious male responses to the feminist movement of the era. It argues that Victorian patriarchy was a fluid theory and set of practices through which Victorian men attempted unsuccessfully to fix gender definitions and their own positions of power. In Victorian novels written by men, the thorough instability of contemporary conceptions of both masculinity and femininity is revealed, as an entire society struggled with new forms of self-awareness and new threats to traditional social structures and systems of belief.

In its specially-commissioned fourteen chapters, this important book discusses an impressively wide range of issues around the theme of male spirituality in the nineteenth century, drawing from history, cultural studies, art history and literary criticism. Topics explored include: ideological and iconographical representations of masculinity across the major Christian denominations; militarism and hymnody; male homosexuality and homoeroticism. The book is not afraid to explore controversial areas, nor to go beyond the generally acknowledged 'canon' of prescribers of gender identity: it includes, for example, leading nonconformist figures like William Booth and Charles Haddon Spurgeon, and early gay writers like John Addington Symonds.

In *Cartooning for a Modern Egypt*, Keren Zdafee foregrounds the role that Egypt's foreign-local entrepreneurs and caricaturists played in formulating and constructing the modern Egyptian caricature of the interwar years. She illustrates how these caricaturists envisioned and evaluated the past, present, and future of Egyptian society, in the context of Cairo's colonial cosmopolitanism.

Providing valuable insights into an element of European nationalism and modernist culture, this book explores the development of the 'Zionist body' as opposed to the traditional stereotype of the physically weak, intellectual Jew. It charts the cultural and intellectual history showing how the 'Muscle Jew' developed as a political symbol of national regeneration.
