Tax Coordination, Tax Cooperation, and Tax Harmonization Tax competition is presented in the academic literature as a game between two (or more) countries that choose simultaneously and non-cooperatively their tax policy, usually their tax rate, on an internationally mobile tax base, usually capital.

*Tax Coordination, Tax Competition, and Revenue ...*

This paper examines the tax competition literature and attempts to draw out its implications for the debate on corporate tax coordination within the EU. It begins with the early basic tax competition model, which derives conditions under which underprovision of public services occurs and tax harmonization unambiguously improves welfare for all states in the union.

*Tax Competition and Tax Coordination in the European Union ...*

This paper contributes to the political debate on commodity tax coordination in Europe. It examines, within Nielsen's setting, the impact of online shopping on taxes and tax competition and contrasts destination?based taxation with origin?based taxation. Heterogeneous consumers surf the Internet at a cost.

*Tax competition, tax coordination, and e?commerce ...*

The literature on tax competition with free capital mobility cites several reasons why it may yield significantly lower tax rates than tax coordination. With a population that can move from one fiscal jurisdiction to another, the Tiebout paradigm suggests that tax competition among these jurisdictions yields an efficient outcome, so that there are no gains from tax coordination.

*Tax competition vs. tax coordination: Revisiting the ...*

Commodity Tax Competition and Tax Coordination Under Destination and Origin Principles\* This Paper proposes a general framework for analysing commodity tax competition under destination and origin principles, based on three possible tax spillovers: the consumer price spillover, the producer price/terms of trade spillover and rent spillovers.

*COMMODITY TAX COMPETITION AND TAX COORDINATION UNDER ...*

Central concerns in the analysis of commodity tax competition, which begins with Mintz and Tulkens (1986), are the characterization of, and comparison between, noncooperative equilibrium and potential coordination measures under both origin taxation (under which goods are taxed according to where they are produced) and destination principles (under which they are taxed where consumed).

*Competition and Coordination*

Abstract There is little doubt that the step towards a monetary union in Europe will increase both the distortionary effects of existing differences in national tax systems and the intensity of tax competition for internationally mobile commodity and factor tax bases.

*Tax competition, tax coordination and tax harmonization ...*

After discussing the welfare properties and comparative statics of non-cooperative equilibria under unconstrained tax competition, the chapter analyses key issues of coordination (within subsets of countries, for instance) and a range of specific topics (such as the nature and impact of tax havens).
