~~Mitchell Zuckoff's Fall and Rise: The Story of 9/11 has one advantage over every book that has come before: distance. In the early days after the attacks, everything was too raw, "too soon.". Reginald Iolanthe Perrin is sick to death with selling exotic ices at Sunshine Desserts. He's fed up with his boss C.J. who delights in making his life hell. And he's had enough of his eager young assistants who think everything is 'super'. So begins Reggie's battle against consumerism. Driven to desperation by the rat race and the unpunctuality of Britain's trains, Reggie's small eccentricities escalate to the extreme. Until, finally, he leaves behind the unacceptable face of capitalism altogether. Driven off in a motorised jelly, and creating the world's biggest loganberry slick on his way, he dumps his clothes on a Dorset beach and sets off for new adventures...

In 1991, Gerald Ratner made a landmark speech to the Institute of Directors After over 25 years in the jewellery trade, Gerald Ratner was one of the most well-known and successful retailers of his generation. He had built up a highly profitable, multi-million pound international business, including household names like Ratners, H Samuel, Ernest Jones, Watches of Switzerland, as well as over one thousand stores in the US. Being asked to give the keynote address at the Institute of Directors' annual conference at The Royal Albert Hall was a great honour and should have been the crowning glory on two decades of empire building. Gerald's speech was seized upon by the media after he included jokes about the quality of some of the shops' products. But the far-reaching impact that these jokes would have no one could have predicted. "Even though I had once had my name above hundreds of shops up and down the country, it had become more famous as a byword for crap. It took several years to realise just what an impact the speech had had on every aspect of my life." Press coverage of hardback version: "... a rollicking good read" –Michael Skapinker, The FT "Most business autobiographies are so overlaid with ghost-writerly blandness that the character of the subject is lost. Mr Ratner had help with this one, but fortunately he is still there: obsessive, funny and a bit of a scoundrel – the last mitigated by how well he knows it." –The FT "self-effacing, revealing and human" –Luke Johnson, FT Business Life "A few ill-chosen words to a well-heeled audience 16 years ago reduced Britain's biggest jeweller to poverty. Now he reveals how he bounced back" –Jewish Chronicle "...contains lessons for us all" –Management Today "...worth its weight in gold" –The Independent Amazon reviews "Everyone knows the story of Gerald's rise and fall – what an amazing story and well worth reading.... I couldn't put it down, totally gripping and inspiring stuff, you really couldn't see this coming from such an energetic, passionate man" "I have read many bio's from business leaders and most are boring 'how to get rich' or 'let me tell you a long list of not very interesting stories with all the good bits missed out'. Gerald's book is very different it is a great read, I could not put it down" "Sobering and enlightening at the same time. A great read and a morality tale of our time."

Years in the making, this spellbinding, heartbreaking, and ultimately uplifting narrative is an unforgettable portrait of 9/11 This is a 9/11 book like no other. Masterfully weaving together multiple strands of the events in New York, at the Pentagon, and in Shanksville, Pennsylvania, Fall and Rise is a mesmerizing, minute-by-minute account of that terrible day. In the days and months after 9/11, Mitchell Zuckoff, then a reporter for the Boston Globe, wrote about the attacks, the victims, and their families. After further years of meticulous reporting, Zuckoff has filled Fall and Rise with voices of the lost and the saved. The result is an utterly gripping book, filled with intimate stories of people most affected by the events of that sunny Tuesday in September: an out-of-work actor stuck in an elevator in the North Tower of the World Trade Center; the heroes aboard Flight 93 deciding to take action; a veteran trapped in the inferno in the Pentagon; the fire chief among the first on the scene in sleepy Shanksville; a team of firefighters racing to save an injured woman and themselves; and the men, women, and children flying across country to see loved ones or for work who suddenly faced terrorists bent on murder. Fall and Rise will open new avenues of understanding for everyone who thinks they know the story of 9/11, bringing to life—and in some cases, bringing back to life—the extraordinary ordinary people who experienced the worst day in modern American history. Destined to be

a classic, *Fall and Rise* will move, shock, inspire, and fill hearts with love and admiration for the human spirit as it triumphs in the face of horrifying events.

*The Rise, The Fall, and The Rise* is the extraordinary story, in her own words, of Brix Smith Start. Best known for her work in *The Fall* at the time when they were perhaps the most powerful and influential anti-authoritarian postpunk band in the world -- *This Nation's Saving Grace, The Weird and Frightening World Of ...* -- Brix spent ten years in the band before a violent disintegration led to her exit and the end of her marriage with Mark E Smith. But Brix's story is much more than rock n roll highs and lows in one of the most radically dysfunctional bands around. Growing up in the Hollywood Hills in the '60s in a dilapidated pink mansion her life has taken her from luxury to destitution, from the cover of the *NME* to waitressing in California, via the industrial wasteland of Manchester in the 1980s. What emerges is a story of constant reinvention, jubilant highs and depressive ebbs; a singular journey of a teenage American girl on a collision course with English radicalism on her way to mid-life success on tv and in fashion. Too bizarre, extreme and unlikely to exist in the pages of fiction, *The Rise, The Fall and The Rise* could only exist in the pages of a memoir.

In the days after the September 11, 2001, terrorist attack, journalist Mitchell Zuckoff led a team that reported and wrote the lead news stories and a series of pieces about 9/11 victims and their families. It was the beginning of an obsession with that momentous day, and a commitment to tell its complete true story. "*Fall and Rise*" is a 9/11 book like no other. Based on years of meticulous reporting, it gives voice as never before to both the lost and the saved. Zuckoff braids the stories of what happened in New York, Washington, D.C., and Shanksville, Pennsylvania, into an account that details the minute-by-minute experiences of those whose lives were forever altered by that day. "*Fall and Rise*" opens new avenues of understanding for anyone who thinks they know the story of that tragic day, and illuminates as never before the extraordinary ordinary people from all walks of life caught up in tragic circumstances they could neither understand nor control.

Today, China is a global power, home to the world's fastest-growing economy and largest standing army—which makes it hard to believe that only 150 years ago, China was enduring defeats by Western imperial powers and neighboring Japan. For a time, the Middle Kingdom seemed like it was on the verge of being overtaken by foreign interests—but the country has quickly and ambitiously become a player on the world stage once again. In this absorbing account of how China refashioned itself, Paul U. Unschuld traces the course of the country's development in the nineteenth and early twentieth centuries. Faced with evidence of the superiority of Western science and technology, Unschuld shows, China delivered an unsparing self-diagnosis, identifying those aspects of Western civilization it had to adopt in order to remove the cultural impediments to its own renaissance. He reveals that China did not just express its many aversions to the West as collective hatred for its aggressors; rather, the country chose the path of reason and fundamental renewal, prescribing for itself a therapy that followed the same principles as Chinese medicine: the cause of an illness lies first and foremost within oneself. In curing its wounds by first admitting its own deficiencies and mistakes, China has been able to develop itself as a modern country and a leading competitor in science, technology, and education. Presenting an entirely new analysis of China's past, this crisp, concise book offers new insights into the possibilities of what China may achieve in the future.

Professor Richard Baum, University of California, Los Angeles, delivers 48 lectures on the history of China.

Perhaps no other Western writer has more deeply probed the bitter struggle in the Muslim world between the forces of religion and law and those of violence and lawlessness as Noah Feldman. His scholarship has defined the stakes in the Middle East today. Now, in this incisive book, Feldman tells the story behind the increasingly popular call for the establishment of the shari'a--the law of the traditional Islamic state--in the modern Muslim world. Western powers call it a threat to democracy. Islamist movements are winning elections on it. Terrorists use it to justify their crimes. What, then, is the shari'a? Given the severity of some of its provisions, why is it popular among Muslims? Can the Islamic state succeed--should it? Feldman reveals how the classical Islamic constitution governed through and was legitimated by law. He shows how executive power was balanced by the scholars who interpreted and administered the shari'a, and how this balance of power was finally destroyed by the tragically incomplete reforms of the modern era. The result has been the unchecked executive dominance that now distorts politics in so many Muslim states. Feldman argues that a modern Islamic state could provide political and legal justice to today's Muslims, but only if new institutions emerge that restore this constitutional balance of power. *The Fall and Rise of the Islamic State* gives us the sweeping history of the traditional Islamic constitution--its noble beginnings, its downfall, and the renewed promise it could hold for Muslims and Westerners alike. In a new introduction, Feldman discusses developments in Egypt, Tunisia, Libya, and other Muslim-majority countries since the Arab Spring and describes how Islamists must meet the challenge of balance if the new Islamic states are to succeed.

Documents the collapse and comeback of America's largest industry in a saga of greed and stubbornness, spotlighting dedicated managers, engineers, and financiers

"Noah Feldman tells the story behind the increasingly popular call for the establishment of the sharia--the law of the traditional Islamic state--in the modern Muslim world. Feldman goes back to the roots of classical Islamic law, under which executive power was balanced by the scholars who interpreted and administered the sharia. That balance was destroyed under Ottoman rule, resulting in the unchecked executive dominance that continues to distort politics in so many Muslim states. Feldman argues that a modern Islamic state could provide political and legal justice to today's Muslims through sharia--but only if new institutions emerge that restore this constitutional balance of power. In a new introduction, Feldman discusses developments in Egypt, Tunisia, Libya, and other Muslim-majority countries since the Arab Spring and describes how Islamists must meet the challenge of balance if the new Islamic states are to succeed."--P.
